ELF™ HEALTHCARE

⟡DATALOGIC

ERGONOMIC AND SAFE

The Elf™ HC PDA is specifically developed for healthcare applications with chemical resistant plastics / enclosure designed to withstand daily cleaning with harsh disinfectant solutions. This model capitalizes the much appreciated Elf ergonomics; the shape and form are designed for human hands. The guitar pick and pen stylus provide additional assistance when entering data, even when wearing gloves.

DATA CAPTURE

The Healthcare industry is affected by a growing usage of 2D codes: wristband identification, exam tracking, specimen bar codes, blood bag traceability, breast milk tracking and medication dispensing. For this reason, the Elf HC has been equipped with a fast and reliable 2D imager able to read a wide array of 1D and 2D bar codes, under any condition.

MADE FOR SILENT ENVIRONMENTS

To assure the maximum respect of patients, especially in patient bedside care applications, the Elf HC is equipped with Datalogic's patented 'Green Spot' technology and a vibrating alert. Both provide good-read feedback, avoiding noisy and annoying beeps.

WIRELESS COMMUNICATIONS

Equipped with an 802.11 a/b/g radio, it offers a CCX v4 maximum level of security. A Bluetooth® EDR is also mounted on this model, for fast data transfer to printers or other peripherals, avoiding the cables.

DEVELOP, DEPLOY, DIRECT

The Elf HC model offers the Windows Embedded Handheld 6.5 platform, including the Datalogic SDK and tools for integrating voice, pictures, and video to create or enhance existing software solutions. Wavelink® device management tools make Elf a simple device to both deploy and maintain.
