

# Zebra® Keyboard Display Units

SEE MORE. DO MORE.

## Save space and eliminate the need for a host computer

Designed for applications where space is at a premium, Zebra's Keyboard Display Units (KDUs) connect directly to Zebra printers and eliminate the need for bulky host computers. Available in two models, the ZKDU™ and KDU™ Plus, these accessories are compatible with Zebra EPL and ZPL® programming languages—ensuring they operate with most Zebra desktop, high-performance and industrial or commercial printers.

Zebra KDUs enable users to quickly and easily:

- Retrieve stored forms
- Enter variable data
- Print labels in stand-alone mode

Since all work can be conducted at the point of application, Zebra KDUs help users eliminate time spent walking back and forth from a dedicated printer, and reduce associated costs and errors.

For additional information on Zebra's KDUs, visit: [www.zebra.com/KDU](http://www.zebra.com/KDU).

## Looking for other options?

Zebra now offers the Print Station application, which enables customers to bypass the need for a keyboard and use their Android™ tablet or smartphone to create templates or perform data-entry tasks at the point-of-printing.
